No. D4-1225-29 Dated 4th July 1931 Received 4.7.31

Diary No. 57	Enclos. 3 Spare copies	Serial No. 1

BRIEF ABSTRACT OF LETTER

Recommends the introduction of a system of bonuses to approved seed rearers, based on their ~~~~ production in lieu of the present system of free distribution of d.f. layings used for purposes of seed.

NOTES AND ORDERS.

A.E. 198-19 1 (1-4). P. D.

Kind reference is invited to the Scheme originally formulated by Mr. N. Rama Rao as Expert of Sericulture for ensuring good seed cocoons and for meeting the demand for disease free layings. It was originally intended that d.f. layings should be supplied free of cost to selected rearers. It is now proposed that they should be sold to seed rearers and that the annual receipts therefrom should be utilised for grant of bonuses to persons preparing large quantities of good seed cocoons.

Ser. File No. 1 of 1931. | General and Revenue Secretariat

The main reason urged by the office Seed rearers' of Bidadi is that at present it is difficult to differentiate between good rearers and bad rearers in regard to seed production and that the bonus system would bring out good seed rearers and induce them to produce good seed cocoons". In the beginning, the cost of bonus is expected to amount to Rs. 25000/. It is not stated how the amount is proposed to be met. In April 1930, the Dir. stated that the proposal would have to be postponed as it involves increased expenditure. The views of the present Director may also be obtained perhaps. Submitted for orders with regd.

With Compliments

I have had the advantage of a consultation with the Supty Sericulture on this subject.

I doubt think that the system of bonus proposed would differentiate between good seed rearers and bad, because the basis adopted is quantitative and not qualitative. It is well known that with a given quantity of leaves and house room, a rearing for seed will have to be smaller than one for getting reeling cocoons; and an offer of reward based on number is likely to tempt rearers to produce quantity in preference to quality. The bonus, which is to be in cash, is too small to be effective as a stimulus, and lacks the permanence of a recognition like a medal or a certificate. And the most serious objection, which is to my mind insuperable is, that the system entails accurate statistical work (since the number of cocoons has to be ascertained) altogether out of proportion to both its utility, and quite beyond the capacity

NOTE—Contn. Sheet.

WD 02553—G PB—50,000—8-7-30

of the ~~Cocoon staff~~ staff employed in the work. I don't think the Coorg scheme suitable — or even workable.

8 What is required is a stricter selection of rearers, elimination of the inefficients, and a closer scrutiny of the rearing work, together with a verification of the quality of the seed cocoons produced by each rearer, by enquiries made in the area where they were used as seed. Even thus we need a strengthening of the staff — but it would be very well worth while. I would recommend the issue of medals (1 gold, 2 silver, 3 bronze) and certificates of approval (say 5) in each of the two seed areas, at a cost of Rs 150/-

9 If this system should be continued for a couple years, the ground will have been prepared for an essential — and to my mind inevitable — development, viz, the licensing & control of seed

General and Revenue Secretariat | File No. 1 of 1931.

Serial No.

by legislation, as in Japan. We shall have called into existence a body of approved seed growers (the holders of medals & certificates) who may be at once granted licenses for manufacturing seed.

OFFICE OF THE DIRECTOR,

Dated, Bangalore, 14th June 1931.

FROM

C. RANGANATHA RAO SAHIB, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore,
(Bangalore, India.)

To

N. Rama Rao, Esq., B.A., B.L.,
Secretary to the Government of Mysore,
Development Departments, Bangalore.

SIR,

In continuation of my letter No. D4-1373/29-30 dated 16-12-1930, I have the honour to submit my proposals regarding the introduction of a system of bonusses to approved Seed Rearers based on their production in lieu of the present system of free distribution of disease free layings used for purposes of seed.

Disease free layings are now given to approved seed rearers free of cost from Government Grainages. Under this arrangement, the seed rearer usually obtains more layings than he can well manage with the crop he can raise on his garden with the result that the quality of the seed cocoons he obtains from his rearings is not up to the standard. The seed rearer does not seek the technical assistance and advice of the Sericultural Departmental staff during the course of the rearings and to submit the worms and seed cocoons to scientific examination. The bonus scheme that is now proposed to be introduced will help to overcome the defects in the present system. This is very necessary to encourage the raising of good seed cocoons and to check the issue of bad seed at the very source. In view of the fact that the bulk of the silk worm seed requirements of the State is still supplied by the seed rearers of Bidadi and Kunigal areas in the form of cocoons only, the bonus scheme - a measure intended to improve the quality of seed cocoons raised by these rearers - is sure to be of immense benifit to the Silk Industry of the State.

The details of the bonus scheme proposed to be introduced are contained in the letter of the Superintendent of Sericulture, a copy of which is enclosed. Disease free layings will be sold to seed rearers for cost as in the other cases and the cost so recovered from them will be utilised for paying them bonuses according to the graduated scale shown in the margin. I expect that in course of time the expenditure on bonuses and the receipts obtained through sale of layings to the seed rearers will balance, so that no extra cost may have to be incurred by Government for paying bonuses. But in the beginning Government will have to bear some cost on this account in view of the fact that the sales of disease free layings for cost will be small. The cost per year in the beginning is estimated to amount to Rs.2,400/- or Rs.2,500/- for both the seed areas of Kunigal and Bidadi (vide statement enclosed for details). I think it is worth while incurring this cost in view of the advantages accruing from the scheme to the silk Industry of the State. I may in this connection also point out that the value of disease free layings supplied free of cost to seed rearers during the years 1928-29 and 1929-30 has amounted to Rs.1,650/- and Rs.1,052/- respectively and their value will increase with increase in the supply of disease free layings to the seed rearers.

Area of garden.	Minimum Qty. of seed cocoons to be produced, per year.	Bonus to be paid
Up to 5 Guntas	12,000	8 annas for every 2500 seed cocoons produced above the minimum.
Above 5 to 10	24,000	-do-
" 10 " 15	36,000	-do-
" 15 " 20	48,000	-do-
" 20 " 25	60,000	-do-
" 25 " 30	72,000	-do-
" 30 " 35	84,000	-do-
" 35 " 40	96,000	-do-
" one acre	1,00,000	-do-

The cost met by Government on account of bonuses will be money spent to the good of the silk Industry unlike the value of seed distributed free of cost which has not fulfilled the intentions of Government and has resulted only in the wasteful use of good seed.

I am of opinion that the scheme may be simultaneously introduced into the Bidadi and Kunigal seed areas from the next year.

The details of this scheme were considered at meetings of seed rearers of both the areas, who have unanimously agreed to the introduction of the scheme (vide copy of the proceedings of the meeting of the Bidadi seed rearers sent with my letter of even number dated 15-3-1930 and copy of the proceedings of the meeting of the Kunigal seed rearers herewith enclosed). The seed rearers of Bidadi have also presented a memorial to the Dewan requesting early introduction of the scheme in their area, which has been forwarded to me for disposal with your Memo No. D.13,299 dated 31-5-1930.

DEPARTMENT OF SERICULTURE

MYSORE STATE

MR. H. S. GOVINDA RAO, B.A.,
Tel. Address—"SERI"

OFFICE OF THE SUPDT. OF SERICULTURE IN MYSORE
EXHIBITION BUILDINGS.

Mysore, 30th June 1930.

FROM

H. S. GOVINDA RAO, ESQ., B.A.,
Superintendent of Sericulture in Mysore.,
MYSORE.

To

C. Ranganatha Rao Sahib, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore,
Bangalore.

SUBJECT AND REFERENCE— Bonus to Seed Rearers.

SIR,

In continuation of my No. 3902 of 16-2-1929 submitting certain proposals re' payment of bonus to seed rearers in seed areas, I have the honour to submit the following revised proposals in view of the discussion at the Seed Rearers' Meeting in Bidadi area held during February 1930:-

The free supply of layings will be stopped and the layings required by the seed rearers will have to be paid for at the rates fixed by Government.

The bonus to be paid will depend upon the cocoons produced and sold for seed by each seed rearer the minimum quantity to be produced and sold for seed by a man having 5 guntas of mulberry garden being fixed at 12,000 cocoons during a period of 12 months. The man is entitled to a bonus of annas eight only for every 2,500 cocoons produced and sold for seed above the minimum fixed.

I enclose herewith a set of rules re' the grant of bonus to seed rearers. I enclose also a form in English and the same in Kannada for adoption in Seed Campaign Offices and by the seed rearers. A sufficient number of the books as per the form in Kannada may kindly be got printed and supplied for free distribution among the seed rearers. The rules also have got to be printed in Kannada and distributed to the seed

rearers

rearers.

As the seed rearers in Bidadi area are anxious that the bonus system should be introduced in the locality early, I request that I may be permitted to bring this system into force immediately in Bidadi area, pending the discussion of the subject with the seed rearers in Kunigal area.

It is difficult to say as to how much amount would be required during the current year towards payment of bonus as the bonus will have to be paid late in the official year and on the amount of work turned out by the seed rearers. I expect that the amount of bonus to be paid may be covered up by the amount realised by the sale of layings to seed rearers.

I request early instructions in the matter.

I have the honour to be,
Sir,
Your most obedient servant,

Superintendent.

30/6/30

TR.

Rules Re' the Grant of Bonus to Seed Rearers.

1. Each seed rearer should obtain the eggs required for each rearing through the Government Grainages only.

2. Each seed rearer should maintain a register as prescribed by the Sericultural Department and have correct entries made under each heading and obtain the signature of the Departmental Officer or the Chairman of the Village Panchayet, certifying to the correctness of the entries made.

3. Each seed rearer should send worms in all the stages for examination to the nearest Seed Campaign Office.

4. Each seed rearer should abide by the instructions issued by the Departmental Officers re' disinfection, rearing, etc.

5. Each seed rearer should send information re' hatching, mounting, etc. of each crop promptly to the nearest seed campaign office.

6. Each seed rearer should give preference to the demand from Government Grainages whenever he has to sell his cocoons for seed.

7. Each seed rearer will be given a cash bonus on the quantity of seed cocoons produced by him during a period of 12 months in the following proportion:-

The minimum quantity of seed cocoons to be produced per year by a man having 5 guntas of mulberry garden is 12,000 seed cocoons. For every 2,500 seed cocoons produced by this man above the minimum, he will be given a cash bonus of annas eight only. The following scale will be adopted:-

Area of Garden.	Minimum quantity of seed cocoons to be produced per year.	Bonus to be paid.
5 guntas.	12,000.	8 annas for every 2,500 cocoons produced above the minimum.
Above 5 up to 10 guntas.	24,000.	- do -
" 10 up to 15 "	36,000.	- do -
" 15 up to 20 "	48,000.	- do -
" 20 up to 25 "	60,000.	- do -
" 25 up to 30 "	72,000.	- do -
" 30 up to 35 "	84,000.	- do -
" 35 up to 40 "	96,000.	- do -
" One acre.	1,00,000 per acre.	- do -

The bonus will be paid on all the seed cocoons above the minimum quantity of cocoons sold for seed. But in case the man produces cocoons good for seed but cannot sell them for seed for reasons beyond his control, such as - want of demand, etc., he will be entitled to the bonus. But, if the cocoons produced are unfit for seed, no bonus will be paid on this quantity.

8. Each seed rearer should as far as possible obtain muchalikas from parties to whom he sells the cocoons for seed.

1.7.80

TR.

30/6/80

KUNIGAL SEED AREA.

Bonus Scheme Cost.

1. Number of approved seed rearers - 340

2. Area under Mulberry belonging to these rearers - 400 Acres.

3. Rearing Capacity of these rearers - 4½ Lakhs of disease free layings of the value of Rs 4,500/-.

4. Minimum quantity of seed cocoons to be produced for the seed rearers being entitled to bonus. - 4 Crores.

5. The maximum quantity of seed cocoons that they can produce during a year - 7,20,00,000 at the rate of 16,000 seed cocoons per 100 layings.

6. Quantity on which bonus will have to be paid in a year - 3,20,00,000 seed cOcoons

7. Bonus on 3,20,00,000 at the rate of Rs 20/- per 1 lakh of seed cocoons Rs 6,400/-

8. Extra cost over the amount realised through sale of layings. Rs 1,900/- or Rs 2,000/-

---

Bidadi Seed area.

Bonus Scheme cost.

1. No of approved seed rearers - 120

2. Area under mulberry belonging to these rearers - 90 Acres.

3. Rearing capacity of these rearers - One lakh of Disease Free layings of the value of Rs 1,000/-

4. Minimum quantity of seed cocoons to be produced for the seed rearers being entitled to bonus - 90 lakhs.

5. Maximum quantity of seed cocoons that they produce during a year. - 160 lakhs at the rate of 16,000 seed cocoons per 100 layings.

6. Quantity on which bonus will have to be paid in a year. - 70 lakhs of seed cocoons.

7. Bonus on 70 lakhs at the rate of Rs20 per one lakh of seed cocoons - Rs1,400/-

8. Extra cost over the amount realised through sale of D.F.Layings or Rs 500/- - Rs 400/-

Total extra cost for both Kunigal and Bidadi Seed areas Rs 2,400/- OR Rs 2,500/-

---

BV30 2/7/31.

DIRECTOR OF I&C.

Proceedings of the Meeting of the Seed Rearers of Kunigal area held at Hebbur on Thursday the 17th October 1930 at 2 P.M.

PRESENT.

1. Mr. C. Ranganatha Rao Sahib, B.A., B.L., Director of Industries & Commerce in Mysore, Bangalore.
2. Mr. H.S. Govinda Rao, B.A., Superintendent of Sericulture in Mysore.
3. Mr. M.S. Muthanna, Senior Sericultural Inspector, Kunigal.
4. Mr. Siddegowda alias Kariappa, Representative Assembly Member, Mogenahalli, Channapatna Taluk and about 70 Seed Rearers of the Kunigal area - namely - Bilidevalaya, Gavi Mutta. Chitnahalli, Mattikere, Ankala Kuppe, Kudur, Kagi Madoo, Huliyurdurg, Chalamasandra, Hebbur and many other important sericultural villages of Tumkur, Kunigal, Gubbi and Magadi Taluks.

Mr. C. Ranganatha Rao Sahib, B.A., B.L., Director of Industries and Commerce in Mysore presided.

With the permission of the President, Mr. M.S.Muthanna, Senior Sericultural Inspector explained to the seed rearers the main outlines of the bonus scheme proposed to be introduced into the Seed areas of Kunigal and Bidadi.

Mr. Siddegowda then spoke of the advantages of the new Bonus scheme both to the seed rearers and to the other sericulturists of the State. He said that he was a sericulturist himself and expected immense benefits to the Silk Industry of the State with the introduction of the Bonus - scheme in the seed areas.

The President requested the Seed rearers to explain their objections to the introduction of the scheme if any.

Mr. Gowri Honnaiya of Huliyurdoorg and a few others - said that seed cocoons from disease-free layings issued from

from Government Farms are not still popular as some people who came in search of seed cocoons hesistate to purchase seed cocoons reared out of Farm Layings.

The Superintendent of Sericulture explained that this fear has grown up in certain places because a few people who had been supplied with max cross-breed xxxxxxx layings had sold max cross-breed cocoons for seed in - spite of the Departmental instructions. He stated that the Departmental officials have since been taking great care to guard against this and that hybrid layings are not issued in seed areas. After further information from the Superintendent of Sericulture the rearers present agreed that Farm layings were issued after careful examination and were therefore decidedly better than the unexamined local seed. If they only took sufficient care in rearing they would get better crops out of Farm layings.

Mr. Halagegowda of Hebbur said that it is desirable to continue free supply for some time more and give bonuse in addition.

The Director impressed on the minds of the rearers that it is not with a view to reduce expenditure to Government, that the bonus system is to be introduced, but with a view to differentiate good seed rearers from others and to encourage the former to produce as many seed cocoons as possible from examined seeds so that the Sericulturists who purchase seed - cocoons from such seed rearers might raise successful crops. He told them that they would make a name for themselves and help the Department to improve the industry in the State - and thus would be saviours of the important subsidiary industry in the State.

Mr. Doddasane Gowda and some others protested against

against the abolition of free supply. They said that it was very cheap and convenient for them to get local seed. Making regular payment in cash for Government disease free layings was not possible for the poor small seed rearers. He represented that even for the average rearer it was not profitable to pay for Farm layings in view of the fact that even crops from these layings were lost on account of pebrine. But this allegation was strongly contradicted by many, especially the Mohamedan sericulturists present.

The Superintendent of Sericulture asked Mr.Sanegowda to state in what age pebrine was found in the worms of disease free layings referred to by him. He replied that pebrine was found in the 4th moult. The Superintendent of Sericulture explained to him that pebrine which appears in the worms so late as in IV moult was due to contagion and not to disease inherited from the mother. The disease free layings issued from Government Grainages are generally free from hereditary pebrine as Government seed has been examined and certified to be free from pebrine. In case pebrine is inherited, the disease would show itself even in 2nd moult and the crop would be a total failure. Mr. Sanegowda stated that pebrine cannot be ordinarily detected in the earlier stages even if it be there. The Superintendent of Sericulture said that this was quite possible for a very careful rearer and said that he would show how to detect pebrine in early states to Mr. Sanegowda if he went to the Kunigal Silk Farm, when the Superintendent of Sericulture was there. Many of the rearers present agreed with the Superintendent of Sericulture and stated that they had no total failures out of disease-free seed.

Mr. Sane Gowda then said that although he was now convinced of the superiority of Government seed it was not still clear to him as to why free supply should be stopped.

The Director then explained that the present practice of the indiscriminate supply of free disease-free layings was doing more harm to the silk industry than good, and that it was therefore found necessary to stop it. He said that it was his intention that the limited ~~quantity~~ quantity of disease free layings that Government Farms were able to produce now should be distributed among the best rearers to whom the bonus would be an additional inducement for improving the work rapidly. After this explanation, Mr. Sane Gowda said that he was fully convinced of the advantage of the bonus scheme and had therefore no objection to accept it.

All the others present then agreed in one voice to the introduction of the bonus scheme in the Kunigal area as early as possible.

The Superintendent of Sericulture then explained clearly the decisions arrived at in the seed rearers' meeting held at Bidadi regarding the rules for the grant of bonus to seed rearers. Some of the ryots wanted to know if they would be paid bonus on cocoons produced which were fit for seed but could not be sold for seed for want of demand etc. They were assured that they would be entitled for bonus on such seed cocoons also. The rearers were also assured that that the officers of the Sericultural Department would be in constant touch with them and help them in maintaining registers correctly and that the Senior Officers of the Sericultural Department in the Circle would have discretion to issue disease free layings on credit and recover the cost from the bonus earned, in special cases.

The following decisions were then arrived at unanimously:-

(1) That the bonus scheme be introduced into the Kunigal Seed area from the coming Mungaru crop, on the same lines as in Bidadi area.

(2) That it is not necessary to reduce the minimum quantity of seed cocoons already fixed in respect of - rearers who own less than 5 guntas of Mulberry garden, because all people who own less than 5 guntas will be entitled to bonus after producing more than 12,000 seed cocoons.

(3) In cases where for want of demand good seed cocoons are given for Reeling, the coccons so sold - should be taken into consideration for giving bonus.

The meeting was closed at 5 P.M. after a hearty vote of thanks to the President.

Order No. D 744-5

Dated Bangalore, the 1931

Disease free layings are at present supplied to approved seed rearers free of cost from Government Grainages. The Director reports that under the existing arrangement, the quality of the seed cocoons

P.T.O.

obtained from the rearings is not up to the standard. He is of the opinion that the granting of cash bonus to rearers of good seed is not suitable as it does not help in differentiating between good seed rearers and bad because the basis adopted is quantitative and not qualitative as it should be. He has therefore recommended the adoption in lieu of a system of awarding medals and certificates to rearers of good seed. so as to serve as an incentive to them to improve the quality of seed produced by them.

Government agree with the Director that instead of awarding cash bonuses to those who come forward to rear good seed, it would be more appropriate from the point of view of performance of recognition, if such awards took the shape of a medal or a certificate of merit. Such a scheme would render possible a stricter selection of rearers, the elimination of the inefficients, and a closer scrutiny of the rearing work, together with a verification of the quality of the seed cocoons produced by each rearer, by enquiries made in the area where they were used as seed.

19

Government are accordingly pleased to direct that the system of supply of disease free layings from Government grainages free of cost to ~~select~~ seed rearers be discontinued and that the layings required by ~~the seed rearers~~ them be charged for at the rates fixed ~~for them~~. With a view, however, to encourage the rearing of good seeds and ~~to~~ bring into existence a body of approved seed rearers, they are pleased to sanction the scheme of ~~the Director to~~ issue medals ~~and certificates of approval~~ to seed rearers who produce really good seed ~~in the Bidadi and Kunigal areas.~~ A beginning may be made by the issue of five medals (1 gold, 2 silver and 2 bronze) and 5 certificates of approval ~~in each of the two seed areas.~~

The Director ~~has~~ estimated that the cost of granting such medals would be Rs.150/- a year. This is sanctioned, and he is requested to point out the source from which the expenditure is proposed to be met during the current year.

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE.

Read:—

Government Order No. D. 2592-604/A&E. 198-19-4 dated 9th September 1929 sanctioning, among other matters, certain concessions for the rearing of seed cocoons.

2. Correspondence ending with unofficial note No. 2-31/D. 4-1225-29 dated 20th July 1931 from the Director of Industries and Commerce in Mysore on the subject of granting encouragement to private seed growers to stimulate the rearing of sound seed.

Order No. D 724-5/Fen 1-31-2

Bangalore, dated the 31st July 1931.

Disease free layings are at present supplied to approved seed rearers free of cost from Government grainages. The Director reports that, under the existing arrangement, the quality of the seed cocoons obtained from the rearings is not up to the standard. He is of the opinion that the granting of cash bonus to rearers of good seed is not a suitable arrangement. He therefore recommends the adoption of a system of awarding medals and certificates to rearers of good seed.

Government agree with the Director that instead of awarding cash bonuses it would be more appropriate ~~permanence~~ if the recognition took the shape of a medal or a certificate of merit.

Government are accordingly pleased to direct that the system of supply of disease free layings from Government grainages free of cost to seed rearers be discontinued and that the layings required by them be charged for at the rates fixed. With a view, however, to encouraging the rearing of good seeds and bringing into existence a body of approved seed rearers, they are pleased to sanction the scheme of issue of medals and certificates of approval to seed rearers who produce really good seed, in the Bidadi and Kunigal areas. A beginning may be made by the issue of five medals (1 gold, 2 silver and 2 bronze) and 5 certificates of approval in each of the two seed areas.

The Director estimates that the cost of granting such medals would be Rs. 150/- a year. This is sanctioned; and he is requested

to

to point out the source from which the expenditure is proposed to be met during the current year.
